

# Henrico County Public Schools Redistricting Project for 2017

2018-19 DRAFT Redistricting Plan Community Survey  
Comments received from May 19 - June 16, 2017 on  
DRAFT Options A Adjusted, C, D Adjusted, and E

## Community Survey Response Analysis

### Introduction

Henrico County Public Schools hosted an online survey from May 19, 2017 to June 16, 2017 in which the public was encouraged to complete questionnaires with their feedback regarding each rezoning option proposed for 2018-19. The data resulting from the Community Survey should be used as a tool to help facilitate the redistricting process. It should not be used solely as a decision-making tool.

### Analysis Methodology

Online survey responses were exported to an excel spreadsheet. The spreadsheet tracked the date the comment was received, contact information for the respondent, the current zoned middle school, and the respondent's comments on each option.

Responses from 370 respondents provided feedback on the options: 45% reside in the Holman Middle School zone, 36% reside in the Hungary Creek Middle School zone, and 11% reside in the Short Pump Middle School zone.

<b>Total Respondents by Live in Middle School Zone</b>		
<b>Live in Middle School Zone</b>	<b>Total Respondents</b>	<b>Percent of Respondents</b>
Brookland MS	5	1%
Fairfield MS	1	0%
Holman MS	168	45%
Hungary Creek MS	133	36%
Moody MS	4	1%
Pocahontas MS	4	1%
Quioccasin MS	1	0%
Short Pump MS	42	11%
Tuckahoe MS	10	3%
Wilder MS	2	1%
<b>Total</b>	<b>370</b>	

The survey asked respondents to share their general attitude towards an option based on the following categories: *Strongly support, Support, Neutral, Oppose, Strongly oppose, and Other*. In order to gain a better understanding of objections, respondents who did *not* support an option were also asked to provide a reason for their concern. The primary concern themes were: *Enrollment data, Feeder Patterns (i.e. elementary to middle, middle to high), Other, School transportation and/or walk zones, School zone boundaries (i.e., use of natural boundaries, such as roadways), Separation of community components (i.e., apartment units, residential subdivisions, etc.), and Phase-in plan for changes*.

### Results Summary from Community Survey

#### Summary of Thoughts/Observations for Each Option

When input was requested on thoughts/observations related to each option proposed for rezoning in 2018-19, 561 typed comments were received.

<b>Total Responses to "What are your thoughts/observations related to an Option proposed?"</b>	
Option A Adjusted Observations	141
Option C Observations	159
Option D Adjusted Observations	163
Option E Observations	98
<b>Total</b>	<b>561</b>

The majority of responses submitted were in regard to the most suitable option for their particular neighborhood/subdivision. Open-ended comments received are provided in Appendix A. The following is a list of the top 6 themes found in the comments related to Option A Adjusted:

- Does not support Option A Adjusted.
- Supports Option A Adjusted.
- Prefer having students in the same neighborhood/geographic area attending the same schools - elementary, middle, and high.
- Gives relief to Hungary Creek Middle School.
- Prefer to have more even splits of students as they transition between schools.
- Does not provide long term capacity relief for the schools. [Hungary Creek Middle and/or Glen Allen High]

The following is a list of the top 6 themes found in the comments related to Option C:

- Does not support Option C.
- Support Option C.
- Does not provide long term capacity relief for the schools. [Hungary Creek Middle and/or Glen Allen High]
- Impacts fewer students than other options.
- Prefer having students in the same neighborhood/geographic area attending the same schools - elementary, middle, and high.
- Provides long term capacity relief for the schools. [Hungary Creek Middle and/or Glen Allen High]

The following is a list of the top 6 themes found in the comments related to Option D Adjusted:

- Want more efficient use of transportation resources, new pattern is not safe; traffic congestion.
- Does not support Option D Adjusted, not in best interest of students.
- Does not provide long term capacity relief for the schools. [Hungary Creek Middle and/or Glen Allen High]
- Prefer Twin Hickory Elementary Students go to Holman Middle School.

- Prefer to have a more even split of students as they transition between schools.
- Supports Option D Adjusted.

The following is a list of the top 6 themes found in the comments related to Option E:

- Supports Option E.
- Approve of having all Twin Hickory Elementary students attend the same middle school.
- Efficient use of transportation resources.
- Plan impacts the greatest number of students.
- Does not support Option E.
- Does not provide long term capacity relief for the schools. [Hungary Creek Middle and/or Glen Allen High]

Summary of Overall Attitude for Each Option

The table below shows respondents’ answers to the question “What is your overall attitude toward an Option?” 29% strongly support/support Option A Adjusted, 36% strongly support/support Option C, 30% strongly support/support Option D Adjusted, and 56% strongly support/support Option E.

Options Attitude Summary								
Option Attitude	Option A Adjusted		Option C		Option D Adjusted		Option E	
Strongly support	34	9%	93	25%	64	17%	184	50%
Support	73	20%	41	11%	49	13%	21	6%
Neutral	53	14%	31	8%	44	12%	18	5%
Oppose	75	20%	44	12%	44	12%	20	5%
Strongly oppose	124	34%	152	41%	155	42%	73	20%
Other	0	0%	0	0%	3	1%	2	1%
No Response	11	3%	9	2%	11	3%	52	14%
<b>Total</b>	<b>370</b>		<b>370</b>		<b>370</b>		<b>370</b>	

Primary Concerns Summary Table

The table below shows the primary concerns of respondents when asked “If you indicated that you oppose or strongly oppose an Option proposed for rezoning, what is your primary concern?” Frequently shared concerns with both options were feeder patterns, separation of community components, and enrollment data.

Options Primary Concern Summary								
Prominent Theme	Option A Adjusted		Option C		Option D Adjusted		Option E	
Enrollment data	21	11%	20	11%	22	12%	18	20%
Feeder patterns (i.e., elementary to middle, middle to high)	79	43%	72	40%	67	35%	28	32%
Other	15	8%	15	8%	27	14%	22	25%
School transportation and/or walk zones	6	3%	2	1%	28	15%	5	6%
School zone boundaries (i.e., use of natural boundaries, such as roadways)	11	6%	9	5%	11	6%	6	7%
Separation of community components (i.e., apartment units, residential subdivisions, etc.)	48	26%	58	32%	32	17%	8	9%
Phase-in plan for changes	3	2%	4	2%	3	2%	1	1%
<b>Total</b>	<b>183</b>		<b>180</b>		<b>190</b>		<b>88</b>	

### Conclusion

To summarize, the data presented in this summary report will be utilized as a tool to help the district prioritize the options. However, when reviewing the options, the results of the community survey should *not* be the only deciding factor.

Appendix A

Live in Middle School	Option A Adjusted Thoughts/Observations
Brookland MS	Does not fix the issue
Brookland MS	This is all Crap!! Henrico County you are setting these kids up to fail. You are grouping like income levels and poverty levels together so these kids will never have a chance. Brookland Middle School got a new principal 3 years ago and he has improved that school a great deal. By bringing kids from Wilder to Brookland you will undo every good thing that has been do at Brookland. If you really want to make things fair for all send some of the Wilder, Henrico kids to Deep Run, Godwin, Glen Allen but I am sure we will NEVER see that happen. I have been very happy with Hermitage but we lost our principle last year and have a principal from Highland Springs (a school that I know for a fact will push a kid through whether they pass or not) I expect Hermitage to start a back slide as this principal comes from a school of underachievers. It's really sad how you hold everyone's future in your hands yet you treat it so lightly. Why shouldn't every child/school get the same opportunities as the mostly white west end schools? Before you even think it I am white. That's just my 2 cents but I have studied this for a while. My daughter had 4 math and Spanish teachers last year she has been taking Spanish for 4 years and has not learned a thing. SAD!!!!
Fairfield MS	Option A does not support the best interest of the children or the community in the Fairfield District.
Holman MS	A lot of students impacted and too many elementary schools split between different middle schools which divides close relationships that have been established.
Holman MS	Against Option A
Holman MS	Bad option
Holman MS	Corrects the feeder pattern at Shady Grove Elementary
Holman MS	Dalton Park feeds to Rivers Edge and Holman. I want my kids to attend these two schools. Please do not break community. I want my kids to have their school friends through school. I would rather like to see Dalton Park feeding to Deep Run High School as part of this whole redistricting. I would like to point out that you may want to wait until next year to finalize the school district based on first year enrollment and other approved developments to permanently redistrict schools. Looking at the big picture and consider the growing west end before pushing students to the west. Consider schools in east and south as well.
Holman MS	Decent option. Less disruptive to many students.
Holman MS	Do not support.
Holman MS	Fairly well balanced. Allows, for the most part, for kids to take some friends to the next school to make the change less intimidating. Small area going into Tucker HS still from Holman - could you swap them with the area just north of them going to Hungary Creek then both will still have a large contingent of friends to take?
Holman MS	Glen Allen Elem students should not attend Holman.
Holman MS	I do not support Option A.
Holman MS	I do not support Option A as it is because it splits only four sections of the Twin Hickory neighborhood apart at Holman with the remainder going to Short Pump. I could support it if you could modify A to include the four sections of Twin Hickory neighborhood that are left out: Scots Glen, Avery Green, Willows Bend and Jameson Park. These are small census tracts.
Holman MS	I do not support this option as it splits Twin Hickory Elementary School between Holman MS and Short Pump MS.
Holman MS	I don't like Option A since it splits my daughter's school Twin Hickory into Holman and Short Pump and takes my daughter out of Holman and puts her in Short Pump!

Live in Middle School	Option A Adjusted Thoughts/Observations
Holman MS	I don't like that Option A splits Twin Hickory Elementary between two middle schools.
Holman MS	I just don't think it will fix the overcrowding at the middle school level and then over to the high school level LONG TERM!!!
Holman MS	I like that this option has the largest number of schools (5/7) closer to the overall poverty rate in the district (though it is unclear to me why it is only 4/7 for all of the others just looking at the data). I don't like that Wilder's poverty rate stays above 70% in this option (though I'm not thrilled that the other options are not meaningfully lower). I do like that there are fewer additional middle school to high school splits in this option (2 versus 3 or 4 with the other options).
Holman MS	I like these pros: 1) Hungary Creek MS would get relief from overcrowding. 2) Shady Grove ES would feed entirely into Short Pump MS. 3) The Twin Hickory ES community located behind Short Pump MS would be assigned to Short Pump MS.
Holman MS	I prefer Option A as my children will move from elementary to middle school with a high percentage of students that they went to school with. Also, they will go to high school with a larger number of students that they were just in school with.
Holman MS	I support option A
Holman MS	I support the option since my Shady Grove Elementary student would follow her friends and peers to Short Pump versus being separated and sent to Holman.
Holman MS	I think the best option is Option D as it keeps all Twin Hickory ES kids together at Holman
Holman MS	It will divide our present elementary school and community.
Holman MS	Impacts too many.
Holman MS	It divides our school at Twin Hickory elementary.
Holman MS	It seems to make the most geographical sense, and balances the demographics well.
Holman MS	It will divide our community and our school.
Holman MS	It would improve transportation for Twin Hickory so communities behind SPMS would be able to attend SPMS. Shady Grove would be kept together. Springfield Park would be kept together. However, the number of students it affects is pretty high.
Holman MS	It's better than Option E. But I do not like the split for Holman Middle School.
Holman MS	Least affected students, no major changes.
Holman MS	Makes since to split Twin Hickory ES.
Holman MS	Most of TH community doesn't attend Holman
Holman MS	Most of TH community doesn't attend Holman
Holman MS	Most of TH community doesn't attend Holman
Holman MS	My daughters and their cousins have been going to the same elementary school since Kindergarten. This option would split them up along with their friends. Twin Hickory needs to stay together.
Holman MS	NA
Holman MS	No
Holman MS	No
Holman MS	No
Holman MS	Not first or second choice.
Holman MS	Not happy with it.
Holman MS	Ok
Holman MS	Ok
Holman MS	Ok, but Option E is best to fix feeder patterns.
Holman MS	Okay
Holman MS	Option A seems ok but not my favorite.
Holman MS	Option A separates my neighborhood (Scots Glen at Twin Hickory) from the rest of the Twin Hickory community. If THES must be split, do it along community lines. Keep

Live in Middle School	Option A Adjusted Thoughts/Observations
	Scots Glen, Avery Green, Jamerson Park and Willows Bend with the rest of Twin Hickory and feed into Short Pump MS.
Holman MS	Option A would result in 3 feeder patterns for the Twin Hickory neighborhood.
Holman MS	Option A would result in 3 feeder patterns for the Twin Hickory neighborhood. It also splits the community into different feeder patterns. This does not make sense.
Holman MS	Our middle school stays the same, and that's good.
Holman MS	Puts more of Twin Hickory neighborhood at Short Pump and improves transportation efficiency for neighborhoods behind Short Pump Middle
Holman MS	Seems like an okay plan, not the best but somewhat close to natural borders
Holman MS	Strongly dislike
Holman MS	Strongly oppose
Holman MS	Strongly oppose because it splits Twin Hickory neighborhood and Twin Hickory Elementary and we have been redistricted 4/5 times in our schools since I have lived here! If you adjusted it to keep our school and neighborhood together, I would support this option.
Holman MS	Support it
Holman MS	Support this option.
Holman MS	Support Twin Hickory to Short Pump
Holman MS	There are too many (3) feeder patterns slated for my neighborhood.
Holman MS	THES will get split and all of our families will not be at Holman together.
Holman MS	This option impacts more students and isn't advisable.
Holman MS	This option keeps communities together and keeps PTA strong.
Holman MS	This option seems to be smart in terms of transportation by allowing THES kids that are in the walk zone for SPMS attend there. Although only 13% of kids will move on to Tucker HS from Holman and that may be tough for that transition.
Holman MS	This option separates a small section of both Twin Hickory neighborhood and elementary and I am in the minority of BOTH. If you choose this option, please add Willows Bend, Jameson Park, Avery Green and Scots Glen back into Short Pump Middle school!
Holman MS	This option spits THES between 2 middle schools and does not make sense!
Holman MS	This option splits THES between 2 middle schools--this does not make sense!
Holman MS	This option splits Twin Hickory ES families.
Holman MS	Too many Twin Hickory families not attending Holman.
Holman MS	Twin Hickory Elementary School families will be split.
Holman MS	Under Option A, my neighborhood (Scots Glen at Twin Hickory) as well as Avery Green at Twin Hickory, Jamerson Park at Twin Hickory and Willows Bend at Twin Hickory (census tracts of 38 and 54) are separated from the rest of the Twin Hickory community. Our 4 neighborhoods would attend Holman while the remainder of the Twin Hickory community would attend Short Pump. Please do not separate our neighborhoods from the rest of the community! This option would have a negative impact on our children as well as our home values.
Holman MS	We support this option as we live close to Holman and like their technology programs. We would prefer to have our elementary-aged son feed to this school.
Hungary Creek MS	Addresses both the overcrowding at HCMS and the transportation problem for Twin Hickory. That alone makes option A the best in my opinion. This also keeps the new River Mill subdivision at HCMS which will help to improve the Virginia Center area and add potential new businesses.

Live in Middle School	Option A Adjusted Thoughts/Observations
Hungary Creek MS	Completely against. Separates too many. Includes River Mill in Glen Allen High School and Hungary Creek.
Hungary Creek MS	Does not alleviate the HCMS overcrowding. Not impressed.
Hungary Creek MS	Does not fix overcrowding at HCMS.
Hungary Creek MS	Does not immediately relieve capacity.
Hungary Creek MS	Doesn't address river mill overcrowding HCMS and GAHS.
Hungary Creek MS	Effects more students than Option C. Splits up our GAES by sending a select few to Holman. More travel time for students involved in the redistricting.
Hungary Creek MS	Feeder pattern is good. Allows for Rte.1 revitalization by keeping River Mill in Hungary Creek district.
Hungary Creek MS	Good option but not the best since overcrowding is not sufficiently resolved and may come back in the near future.
Hungary Creek MS	Hunton Fields - shows 2 middle school children with 25 houses under construction now? Swanson Mill shows one child with 4 house currently breaking ground and about 4 more lots left with developer having option of 100 more acres in here that connect to Swanson Mill projection is one middle school child? Then 104 middle school kids from River Mill with 1000 homes? These are just 3 examples of outrageously underestimated projections. Hungary Creek is once again in jeopardy of overcrowding immediately due to poor planning based on wildly inaccurate projections. Risk of River Mill massive development needs to go to middle schools with current capacity.
Hungary Creek MS	I do not approve of the feeder patterns with this option.
Hungary Creek MS	I don't see that this option is going to offer long term solutions.
Hungary Creek MS	I like that it gives relief to Hungary Creek.
Hungary Creek MS	I like the relief it provides to Hungary Creek. However the Glen Allen High School will be over crowded in 2024.
Hungary Creek MS	I like to see that areas that are geographically close to a middle school are now zoned to that middle school (the kids who were right next to Short Pump going to Holman, etc.).
Hungary Creek MS	I'm concerned about having bus travel with young children on I295 without seat belts to get to Holman Middle school.
Hungary Creek MS	Immediate relief to HCMS.
Hungary Creek MS	It does not adequately address Hungary Creek overcrowding issues with the inclusion of the new River Mill.
Hungary Creek MS	It does not make sense! It is a major force move that only benefits a document and numbers on paper. It is not an effective move if you are trying ensure better education options for children.
Hungary Creek MS	It is a good option for the residents of Magnolia Ridge because it places the future River Mill neighborhood to Hungary Creek/Glen Allen schools. It is important to us to have our neighbors go to the same schools as our kids.
Hungary Creek MS	It provides a small amount of relief for HCMS.
Hungary Creek MS	Like that it immediately alleviates the overcrowding at Hungary Creek and keeps River Mill in HCMS/GAHS school zones.
Hungary Creek MS	Magnolia Ridge neighborhood should remain at Hungry Creek Middle School.
Hungary Creek MS	Negative
Hungary Creek MS	Neutral
Hungary Creek MS	No
Hungary Creek MS	Not an option for us and should not be considered - splits up GAES, continues to drive overcrowding in both MS and HS, continues to enable River Mill to flow into a path that does not make sense simply because they do not want to sell a development for the Brookland and Hermitage schools.
Hungary Creek MS	Not good

Live in Middle School	Option A Adjusted Thoughts/Observations
Hungary Creek MS	Not the best for my children
Hungary Creek MS	Oppose
Hungary Creek MS	Option A is ok; though Short Pump Middle School lines don't seem to veer eastward enough.
Hungary Creek MS	Option A is one of the better options.
Hungary Creek MS	Option is best for our community and school growth. It is best to keep the schools in the same neighborhood.
Hungary Creek MS	Options A and D provide immediate relief at Hungary Creek Middle School. If our goal is truly to get this school to the target capacity, only Options A and D provide immediate relief. Options C and E would result in Hungary Creek having nearly 100 more kids (than Options A and D) in 2018.
Hungary Creek MS	Seems like a reasonable option
Hungary Creek MS	Splits Glen Allen Elementary between Holman and Hungary Creek.
Hungary Creek MS	Splitting the current elementary schools seems fair, and still allows everyone zoned to a "good" school district gets to stay in a good school district, even though a small number has to change schools, so everyone wins.
Hungary Creek MS	Still too much overcrowding.
Hungary Creek MS	Strongly oppose
Hungary Creek MS	Strongly Oppose - Option A Revised allows HH Hunt's River Mill in Fairfield District to overcrowd Brookland Schools. HCPS values revenue over its current Brookland District constituents. How dare HCPS use the HCMS redistricting to fix accreditation issues. Teach basics & stop increasing the rigor annually and you may see progress in these struggling schools!
Hungary Creek MS	Support
Hungary Creek MS	The current HCPS mini-redistricting effort was initiated as an intervention to alleviate the over-crowding at Hungary Creek Middle School, which is so over-capacity the school has 5+ trailers to accommodate current students. Any redistricting option which zones River Mills (a 1,000+ high density dwelling future development) into this already crisis-level student population at Hungary Creek is insane. Henrico County and the developer *should* be working together to build new schools to accommodate the heavy growth and expected development along the Virginia Center Commons area. HHHunt did so for both the Wyndham and Twin Hickory developments which are both situated in the West End of Henrico County.
Hungary Creek MS	The main focus must be reducing the overcrowding at HCMS, not addressing the needs of unknown students who are not residing in houses that are not yet built.
Hungary Creek MS	The purpose of this redistricting plan is to alleviate the overcrowding at the middle school and Option C does not immediately fulfill this goal, but Option A does.
Hungary Creek MS	This keeps River Mill in the Hungary Creek school district. Magnolia Ridge residents feel that zoning River Mill to Brookland will be a huge obstacle to revitalizing the Route 1 corridor. We are also concerned that if this bordering community is zoned to Brookland, then eventually we could be rezoned to Brookland. This hypothetical possibility would fail to provide our children with the quality education they would get at a higher achieving school. Additionally this would hurt current home values, again making it difficult to bring fruitful commerce to our area of Henrico County.
Hungary Creek MS	This option does not adequately address overcrowding at Hungary Creek.
Hungary Creek MS	This options splits us up from the GAES children and sends our small community of Hunton Park to Holman. Hunton Park children will be sent on the interstate to get to Holman, this seems to be an added safety risk that the HCPS is taking with our children. The deduction of the numbers that will be seen at Hungary Creek by sending

Live in Middle School	Option A Adjusted Thoughts/Observations
	Hunton Park to Holman is minimal and truly does not help the overcrowding issue. I am strongly opposed to this option.
Hungary Creek MS	Too many splits affecting school communities.
Hungary Creek MS	While from a Hungry Creek Middle School perspective the change would be positive, having River Mill attend Glen Allen High School will do nothing to alleviate the current overcrowding that GAHS is experiencing. As a property owner/taxpayer it is preferred that excess capacity at other high schools be leveraged to alleviate overcrowding than to continue at enrollment levels that exceed capacity and/or making capital improvements to alleviate the overcrowding.
Hungary Creek MS	Will help to reduce overcrowding at Hungry Creek.
Hungary Creek MS	Zoning the new River Mill subdivision to HCMS and GAHS is very short sighted. While this may alleviate the current overcrowding somewhat - it is setting these schools up to be overcrowded again - while leaving other schools with a fair amount of capacity. It is shameful that the selling aim of a developer is taking precedence over our existing residents! The projections show HCMS and GAHS overcrowded again in years with this option - and this is with the flawed student formulas in place. When we were told how the formulas work for determining the estimated number of students from a new development - it was laughable how inaccurate they are. I think the situation will be even worse than the projections. This impacts my kid's education, my home value and I'm not happy. Option C is the only good choice!
Moody MS	Puts more kids into Moody, not sure how I feel about that.
Moody MS	This would not help Wilder at all. Poverty rate basically stays the same. Holman and Short Pump MS have area/capacity to reach out and help with this problem but their rates do not change very much in this version.
Short Pump MS	Good plan
Short Pump MS	Great option
Short Pump MS	It is Ok, but I prefer Option E because it more fully utilizes Short Pump Middle, relieves overcrowding, and helps balance poverty rates and transportation costs.
Short Pump MS	Looks good
Short Pump MS	Neutral
Short Pump MS	Not the best option
Short Pump MS	Ok
Short Pump MS	Splitting elementaries is misguided. Also SPMS is so far under capacity that Holman should not get any kids west of Nuckols Road.
Short Pump MS	Strongly approve
Short Pump MS	Stupid to break up Twin Hickory neighborhood into parts the way this plan does.
Short Pump MS	This would provide three feeder patterns for Twin Hickory which doesn't make sense.
Wilder MS	I do not think that Wilder should be rezoned. Instead of my children's school being closer to home, it would be a longer route to get them to and from school.

Live in Middle School	Option C Thoughts/Observations
Brookland MS	It's ALL crap.
Brookland MS	I am appalled that the school board would even consider HHHunt's demands to move the district lines to accommodate their needs.
Fairfield MS	Option C does not support the best interest of the children or the community in the Fairfield District.
Holman MS	We support this option as we live close to Holman and like their technology programs. We would prefer to have our elementary-aged son feed to this school.
Holman MS	Very similar to A; minor changes.
Holman MS	Under Option C, my neighborhood (Scots Glen at Twin Hickory) as well as Avery Green at Twin Hickory, Jamerson Park at Twin Hickory and Willows Bend at Twin Hickory (census tracts of 38 and 54) are separated from the rest of the Twin Hickory community. Our 4 neighborhoods would attend Holman, while the remainder of the Twin Hickory community would attend Short Pump. Please do not separate our neighborhoods from the rest of the community! This option would have a negative impact on our children as well as our home values.
Holman MS	Twin Hickory ES families will be split.
Holman MS	Twin Hickory ES Families will be split.
Holman MS	Too many more of the Echo Lake ES kids are zoned to Hungary Creek.
Holman MS	This option splits THES between 2 middle schools and does not make sense!
Holman MS	This option separates a small section of both Twin Hickory neighborhood and elementary and I am in the minority of BOTH. If you choose this option, please add Willows Bend, Jameson Park, Avery Green and Scots Glen back into Short Pump Middle school! In addition, I believe that the growth that River Mill offers is good for the county and this option does not give them the schools that they believed they would have.
Holman MS	This option keeps community and PTA strong.
Holman MS	This option again splits up my daughters from their cousins and friends that they've been going to school with since they were in kindergarten. It doesn't make sense.
Holman MS	This Map C divides our school, too.
Holman MS	This is the option which effects the least number of kids, provide better transportation option among all other options.
Holman MS	This is our preferred option.
Holman MS	This impacts less students so I support it.
Holman MS	THES families will be split and all will not be at Holman together.
Holman MS	There are too many (3) feeder patterns for my neighborhood.
Holman MS	Support Twin Hickory to Short Pump.
Holman MS	Support option C.
Holman MS	Support it
Holman MS	Strongly oppose because it splits Twin Hickory neighborhood and Twin Hickory Elementary and we have been redistricted 4/5 times in our schools since I have lived here! If you adjusted it to keep our school and neighborhood together, I would support this option.
Holman MS	Strongly oppose
Holman MS	Splits THES between 2 middle schools--this does not make sense!

Live in Middle School	Option C Thoughts/Observations
Holman MS	River Mill would be moved to the Brookland MS zone. Currently, no students live in this area. Would be more efficient for transportation. Twin Hickory ES community located behind Short Pump MS would be assigned to Short Pump MS (that area currently attends Holman MS). This improves transportation efficiency. Shady Grove ES would feed entirely into Short Pump MS, instead of split between Holman MS & Short Pump MS. Springfield Park ES feed entirely into Holman MS, instead of being split between Holman MS and Hungary Creek MS. Affects the fewest number of students: 558
Holman MS	Puts more of Twin Hickory neighborhood at Short Pump and improves transportation efficiency by allowing students to walk to Short Pump.
Holman MS	Option C would result in 3 feeder patterns for the Twin Hickory neighborhood. It also splits the community into different feeder patterns. This does not make sense.
Holman MS	Option C would result in 3 feeder patterns for the Twin Hickory neighborhood.
Holman MS	Option C separates my neighborhood (Scotsglen at Twin Hickory) from the rest of the Twin Hickory community. If THES must be split, do it along community lines. Keep Scotsglen, Avery Green, Jamerson Park and Willows Bend (census tracts of 38 and 54) with the rest of Twin Hickory and feed into Short Pump MS.
Holman MS	Option C is ok
Holman MS	Ok, but E is best as it fixes feeder patterns.
Holman MS	Ok
Holman MS	Not enough Twin Hickory families attending Holman.
Holman MS	Most of TH community doesn't attend Holman.
Holman MS	Most of TH community doesn't attend Holman
Holman MS	Most of TH community doesn't attend Holman
Holman MS	Makes sense to split Twin Hickory ES. Keep Sadler at Holman.
Holman MS	It's a good option.
Holman MS	It will divide our school.
Holman MS	It will divide our school and community.
Holman MS	It will divide our community.
Holman MS	If you consider this option please adjust it to include the Twin Hickory neighborhoods of Willows Bend, Avery Green, Scotsglen and Jameson Park because, as plan C is currently, it excludes these four small sections: two census tracts of 54 and 38 students.
Holman MS	I think this is the best option. It uses common sense borders for the school zones. People are, for the most part, going to the schools closest to their homes.
Holman MS	I support this option since it impacts the least amount of students. The pros also suggests that multiple elementary schools will feed into only one middle school, which seems beneficial for students and transportation efficiency.
Holman MS	I support the option since my Shady Grove Elementary student would follow her friends and peers to Short Pump versus being separated and sent to Holman.
Holman MS	I strongly support Option C.
Holman MS	I like these pros: 1) Springfield Park ES would feed entirely into Holman MS, instead of being split between Holman MS and Hungary Creek MS. 2) The Twin Hickory ES community located behind Short Pump MS would be assigned to Short Pump MS.
Holman MS	I like that the fewest number of students are affected by this option. Because there is nowhere else to provide this feedback logically within this survey (i.e. a question inviting additional feedback), I want to share that I am concerned by the high poverty rate at Wilder under any of the options and the extraordinarily low poverty rate at Short Pump in all options. I worry that the introduction of the gifted center at Wilder - as I understand it - will only mask the numbers as opposed.

Live in Middle School	Option C Thoughts/Observations
Holman MS	I do not support this option as it splits Twin Hickory Elementary School between Holman MS and Short Pump MS.
Holman MS	I do not like Option C since it splits my daughter's school Twin Hickory into Holman and Short Pump and takes my daughter out of Holman and puts her in Twin Hickory.
Holman MS	I and many of us in Twin Hickory that are considered walkers to SPM(even though it is not possible through the swampy area we would need to walk through) would support C if adjusted to have Twin Hickory Elementary feeding into Holman Middle School.
Holman MS	I am happy with the number of students my children will continue to go to school with from elementary to middle. I don't like the low percentage of students at Glen Allen High School that my children will continue to their education with from middle to high.
Holman MS	I also don't like Option C because it splits Twin Hickory Elementary between two middle schools.
Holman MS	Good
Holman MS	Fairly well balanced. Allows, for the most part, for kids to take some friends to the next school to make the change less intimidating. Small area going into Tucker HS still from Holman - could you swap them with the area just north of them going to Hungary Creek then both will still have a large contingent of friends to take?
Holman MS	Don't split THES.
Holman MS	Don't like it
Holman MS	Don't approve
Holman MS	Do not support
Holman MS	Corrects the feeder pattern at Shady Grove Elementary.
Holman MS	Better than Option E and slightly better than Option A. I do not like splitting Holman middle school with a third school.
Holman MS	Best option since it impacts least students
Holman MS	Best option by far. Allows the most number of kids to go to the schools nearest their homes. Feeder patterns are the least terrible.
Holman MS	Best for Holman
Holman MS	Again, smart in terms of transportation for SPMS. Affects fewest # of students.
Holman MS	Again, it moves people around on the eastern side but can you assure we won't get redistricted again in the next 4-5 years??? Our high schools are going to become overcrowded and homes/townhomes are continuing to build. We need to account for future builds and get accurate numbers before we continue.
Holman MS	Affects fewest number of students.
Holman MS	Acceptable option
Hungary Creek MS	Worst option in my opinion. The only reason people want this is to keep the current GAES kids together which is a terrible reason. This redistricting should be about education and improving as many areas as possible while alleviating overcrowding....not keeping kids together. Grow up!!
Hungary Creek MS	Worst option for our Henrico communities. The area at Virginia Center is trying to revitalize, which is why the new developer chose that area to build River Mill. The homes will sell at a higher price, which means people who live there will be able to put money BACK into the community and raise that area back up. If that area is redistricted to Brookland MS/Hermitage HS, the home values will be much lower for both the homes being built as well as the homes surrounding that area, lower income families will be moving to that area, and the revitalization will have no chance. "Keeping kids together" should NOT be the purpose for choosing any option. It should be about relieving some of the overcrowding while also doing what's best for the communities in

Live in Middle School	Option C Thoughts/Observations
	our area. And to me, adding as many developments in great school districts is what's going to do that.
Hungary Creek MS	This zones River Mill to the Brookland school district. Magnolia Ridge residents feel that zoning River Mill to Brookland will be a huge obstacle to revitalizing the Route 1 corridor. We are also concerned that if this bordering community is zoned to Brookland, then eventually we could be rezoned to Brookland. This hypothetical possibility would fail to provide our children with the quality education they would get at a higher achieving school. Additionally, this would hurt current home values, again making it difficult to bring fruitful commerce to our area of Henrico County.
Hungary Creek MS	This option is the only logical option. It impacts the least number of kids, bus transportation is at a minimum, considers wishes of current residents vs. the developer of River Mill, and keeps the school feeder patterns together versus splitting up more kids from more schools.
Hungary Creek MS	This option is the least favorable for us. It is important to us not to have this option selected.
Hungary Creek MS	This one keeps my children at Hungary Creek. It works on eliminating the overcrowding issue at Hungary Creek. It affects the least number of students.
Hungary Creek MS	This is the only option that would support long term capacity of HCMS and GAHS. It is the only option that will keep River Mill out of these schools.
Hungary Creek MS	This is the only option that would contribute to a solution for the overcrowding issue the exists at HCMS and GAHS by zoning future River Mill students to their appropriate area school and not displacing current students to save room for them in the meantime.
Hungary Creek MS	This is the only option that successfully reduces overcrowding at both Hungry Creek Middle School and Glen Allen High School.
Hungary Creek MS	This is the only option that has less than 3 high schools over crowded by 2024. This option spreads the risk of River Mill far exceeding 104 middle school students to bigger schools that are not currently overcrowded. However, as stated previously, the new builds are wildly understated and Swanson Mill Run Ryan Homes has option on another 100 acres in here for more homes so by 2024 I expect we will double in size yet projections say 1 more kids on the existing 7 home sites open for build? Crazy?
Hungary Creek MS	This is the only option that does not overtax HCMS and GAHS in the long run. While not giving as much immediate relief - there still is some relief now. But it is a better long term plan - and the county needs to think further down the road, not just the next couple of years. It's that short-sightedness that got us in this situation to begin with.
Hungary Creek MS	This is the only option my family supports and believes will do the most good to relieve HCMS overcrowding, which is our primary concern.
Hungary Creek MS	This is terrible. I and my community oppose. The River Mill area is of utmost importance to re-vitalization of the Route 1 corridor and Virginia Center Commons businesses and to the status of Glen Allen as a great community.
Hungary Creek MS	This is not a good long term fit.
Hungary Creek MS	This is by FAR the best option offered.
Hungary Creek MS	This element has too many moving parts and would equate to confusion.
Hungary Creek MS	The main focus must be reducing the overcrowding at HCMS, not addressing the needs of unknown students who are not residing in houses that are not yet built.
Hungary Creek MS	Support Option C because this is the only option that does not zone new development River Mills to HCMS and GAHS. The current HCPS mini-redistricting effort was initiated as an intervention to alleviate the over-crowding at Hungary Creek Middle School, which is so over-capacity the school has 5+ trailers to accommodate current students. Any redistricting option which zones River Mills (a 1,000+ high density

Live in Middle School	Option C Thoughts/Observations
	dwelling future development) into this already crisis-level student population at Hungary Creek is insane. Henrico County and the developer *should* be working together to build new schools to accommodate the heavy growth and expected development along the Virginia Center Commons area. HHHunt did so for both the Wyndham and Twin Hickory developments, both situated in the West End of Henrico County.
Hungary Creek MS	Support as seems to change least amount.
Hungary Creek MS	Support
Hungary Creek MS	Strongly Support - It's the only option preventing FUTURE FAIRFIELD residents out HCMS & GAHS. It also keeps GAES community together in future feeder patterns w/o overcrowding GAHS. Build new school for Fairfield District versus sending them to Brookland District!
Hungary Creek MS	Strongly oppose this option. It will put a serious deficit on our community to grow.
Hungary Creek MS	Strongly oppose Option C
Hungary Creek MS	Strongly oppose
Hungary Creek MS	Provides the most relief for HCMS and affects the least number of students.
Hungary Creek MS	Overall, this is the most favorable plan. I respect that many far west end parents are concerned about which highly rated school their children attend, but keep in mind that Holman and Short Pump are two very desirable schools. The overcrowding at Hungary Creek Middle has negatively impacted students and teachers and the learning environment there. I don't believe our friends down Nuckols Road fully appreciate that because they have not experienced it. Review the pros of your plan C, address the overcrowding at Hungary Creek which is a primary reason for this redistricting project. Absolutely do not cater to a developer and future residents of a neighborhood that has not even been built yet. Select the plan that addresses the most pressing needs now, and then focus on improving the schools that need a boost.
Hungary Creek MS	Options A and D provide immediate relief at Hungary Creek Middle School. If our goal is truly to get this school to the target capacity, only Options A and D provide immediate relief. Options C and E would result in Hungary Creek having nearly 100 more kids (than Options A and D) in 2018.
Hungary Creek MS	Option C would leave HCMS waiting for significant capacity reduction until 2020. This is unacceptable and does NOT meet the #1 goal of this process.
Hungary Creek MS	Option C will lessen the prospect for development of the Rte. 1 corridor. Economic development and schools are linked. Less development means fewer residents, possibly, and continues to concentrate County resources elsewhere. The resources need to be evenly distributed. Further, this option creates a separation of the planned River Mill neighborhood and Magnolia Ridge. The neighborhoods are physically linked, which would seem to suggest they would be in the same districts. If River Mill is not developed as planned, it will have an impact on the economic development of the area overall, and schools will feel that impact.
Hungary Creek MS	Option C provides better long-term capacity relief, keeps GAES together for MS & HS, and is the only option that DOES NOT cause future overcrowding at GAHS.
Hungary Creek MS	Option C is the only option that adequately addresses the new subdivision River Mill by removing it from Hungary Creek's zoning.
Hungary Creek MS	Option C is my preferred choice as it does the most good, with the least harm, for HCMS, BMS, GAHS, and HHS.
Hungary Creek MS	OPTION C does NOT immediately reduce the enrollment at HCMS like A or D would. Option C still has HCMS at 100% capacity for 2018!! The purpose of this redistricting plan is to alleviate the overcrowding at the middle school and Option C does not immediately fulfill this goal!

Live in Middle School	Option C Thoughts/Observations
Hungary Creek MS	Option C does not help with the revitalization of Rte. 1. This option only appears to benefit West End.
Hungary Creek MS	Of the current plans, this is the best for my feeder pattern (GAES, HCMS, GAHS) for the long term. It keeps GAES together, gets HCMS to the lowest buildout capacity (83%) and does not create overcrowding at GAHS as a result. However, the board really needs to address the overcrowding at the high school level that is on the horizon with these plans. Do not continue the overcrowding at these West End schools. We have time before these changes are implemented. Start over. Adjust both middle and high school boundaries. Keep as many elementary schools as possible together in their feeder patterns and stop funneling kids in one magisterial district into schools in another. You are shifting the problem, not solving it!
Hungary Creek MS	Not the best option
Hungary Creek MS	Not good
Hungary Creek MS	Not acceptable for residents around Route 1. It separates our neighborhood from our neighboring River Mill.
Hungary Creek MS	No
Hungary Creek MS	New development going to Brookland when neighboring development at HCMS.
Hungary Creek MS	My neighbors and I in Magnolia Ridge supported the River Mill community to the county with the guideline that River Mill would be an extension of our community. With River Mill physically connected to our community, we need to see River Mill's kids going to Hungary Creek. It will be bad for River Mill's kids, our kids and our community to have River Mill zoned to an accredited school.
Hungary Creek MS	My fear is that with the new development of River Mill being rezoned to Brookland MS, price values in the adjacent neighborhood (Magnolia Ridge) would decrease and that the homes that HHHunt had planned to build will be done on a lower value due to the fact that Brookland is only partially accredited and 2/10.
Hungary Creek MS	Magnolia Ridge needs to stay at Hungary Creek and Glen Allen High School.
Hungary Creek MS	Magnolia Ridge and River Mill should be kept together at Glen Allen HS and Hungary Creek MS.
Hungary Creek MS	Keeps the Glen Allen Elementary students together and reduces overcrowding at Hungary Creek and keeps Glen Allen High at capacity.
Hungary Creek MS	Keeps all of Glen Allen Elementary at Hungary Creek.
Hungary Creek MS	It does nothing to help the overcrowding in HCMS.
Hungary Creek MS	Impacts fewer kids, helps with overcrowding at HCMS. Best option.
Hungary Creek MS	I support this option. It provides the greatest long-term relief to Hungary Creek Middle, the school that was the initial concern for this redistricting. It also sends River Mill to Brookland and Hermitage, as originally zoned and noted in a March meeting by Dr. Kinlaw.
Hungary Creek MS	I strongly DISAGREE with the redistricting of this area. The cut-off point should be 195. With the proposed new development to the north of us, it would make sense to include plans for another middle school in this area at the most and at the least to keep our catchment area, Magnolia Ridge, as it is at the moment. I am worried about the overcrowding that is going to occur in the Brookland school system. This school redistricting also does not make sense where it is as we are so far from Brookland Middle School. We bought in this area because of the good school system. Please, I strongly urge you to reconsider this proposal.
Hungary Creek MS	I most strongly support this option. I think it provides the best long term solution as it is the only option that brings down the utilization percentage for both Hungary Creek and

Live in Middle School	Option C Thoughts/Observations
	Glen Allen HS below 100%. In my opinion, every other option will lead to a need for more redistricting a few years down the road.
Hungary Creek MS	I live in Magnolia Ridge, I do not want my future neighbors zoned to a middle school that is not accredited. This would be detrimental to my neighbors' children and the community I am raising my children in.
Hungary Creek MS	I like that it takes River Mill out of the school zones. I do not think that it's right to consider a development which does not currently have residents pushing students out of their zoned school.
Hungary Creek MS	I feel that Option C is not a good long term plan.
Hungary Creek MS	I don't think moving such a small area to Short Pump Middle is going to alleviate the overcrowding situation at Hungary Creek at all.
Hungary Creek MS	I do not like C because it does not provide enough relief for Hungary Creek Middle School.
Hungary Creek MS	I bought my house based on the current schools. I don't want to move but will if the school standards are lowered as well as many neighbors.
Hungary Creek MS	I believe this is the best option.
Hungary Creek MS	I approve.
Hungary Creek MS	I agree and strongly support OPTION C.
Hungary Creek MS	Hurts the revitalization of Rte. 1 project because River Mill will be zoned for Brookland, which is not accredited...which means no high end homes will be built in that community, which leads to no money in the community to allow for revitalization of Rte. 1 corridor, which will significantly impact the county.
Hungary Creek MS	Highly approve because it KEEPS RIVER MILL out, keeps numbers lower, and keeps families together.
Hungary Creek MS	Fully support - only option that keeps GAES together AND avoids overcrowding in the future of HC and Glen Allen HS's. We need to think about the future overcrowding. This is the ONLY option that gets us out of an overcrowding discussion going forward. At this point any other option keeps GAES student in an overcrowding situation for their entire school career.
Hungary Creek MS	Does not give immediate relief. Will still be a problem for a few years.
Hungary Creek MS	Does not relieve capacity at Hungary Creek for a minimum of 3 years.
Hungary Creek MS	Does not reduce the numbers
Hungary Creek MS	Do not like that enrollment remains high at 100% in 2018, 98% in 2019 and 95% in 2020. HCMS does not achieve lower enrollment until 2021 unlike A and D which receive greater relief in the very first year of the changes. It also removes River Mill from HCMS/GAHS and our area needs this new subdivision to spur on revitalization to the Route 1/Virginia Center Commons corridor. Our neighborhood approved of this subdivision based on it being tied in to our same schools and knowing the demand it would bring for our ailing shopping and dining options.
Hungary Creek MS	Breaks up too many kids. Leaves HCMS at high enrollment rates for the first 2 years.
Hungary Creek MS	Although it's not perfect, it's the only option that will keep HCMS and GAHS at or under capacity. I don't understand how you could possibly consider any other option! This is all about THE KIDS who have been in trailers since they were babies! Get them some relief!
Moody MS	The fact that Magnolia Ridge is currently bused to an overcrowded middle school 8.9 miles away, and that River Mill could potentially be bused there as well as ludicrous. Wilder is 7.3 miles away from my friend's house who lives in Magnolia Ridge, Moody is 5.4 miles away, and Brookland is only 3.7 miles away! And yet they're bused to the overcrowded Hungary Creek, 8.9 miles away?! Unbelievable.

Live in Middle School	Option C Thoughts/Observations
Moody MS	I like that areas that are closer to Brookland are actually zoned to Brookland instead of passing Brookland to get to HCMS. I wish that the poverty rates were higher at Holman like it is in Option D & E.
Moody MS	I like Option C. The children who will move into River Mill have NO reason to be bussed to Hungry Creek Middle School. They practically pass Brookland on the way. Sending the children there would probably bring the school back to full accreditation. Glen Allen HS and Hermitage HS are about the same distance. I don't care about keeping kids from elementary school together to go to middle school. My kids go to Holladay and they either go to Brookland or Moody.
Short Pump MS	This option would provide three feeder patterns for Twin Hickory which doesn't make sense.
Short Pump MS	Stupid to break up the Twin Hickory community into different parts this way. Kids in the same communities should be kept together.
Short Pump MS	Same as A.
Short Pump MS	Ok
Short Pump MS	Not the best option
Short Pump MS	Neutral
Short Pump MS	Negatively impacts lower income families. Seems to create unnecessary school splits. Doesn't provide Hungry Creek enough relief. We will all just have to redo this again soon.
Short Pump MS	Most logical and affects least amount of students. Also makes most sense for transportation.
Short Pump MS	Makes the most sense. Splits the least number of schools. Disrupts the least amount of students. Minimize bus routes. Has the most logical feeder patterns.
Short Pump MS	Makes the most sense. Splits the least number of schools. Disrupts the least amount of students. Minimize bus routes. Has the most logical feeder patterns.
Short Pump MS	Makes good financial cents!
Short Pump MS	Indifferent
Short Pump MS	I prefer this to A, but overall prefer E because it fully utilizes Short Pump Middle.
Short Pump MS	1. Lets the most number of kids go to the schools closest to them. 2. Maps make sense. 3. Fewest number of kids impacted. 4. Feeder patterns are the most even.
Wilder MS	I still think it's unfair to move the kids from Wilder away from home.

Live in Middle School	Option D Adjusted Thoughts/Observations
Brookland MS	I am a proud mother of a Hermitage HS/Brookland MS grad, a teacher who taught at Hermitage HS, and a mother of a Henrico HS rising freshman. I want the school board to consider the needs of ALL students in drawing the district lines, not just the students of affluent parents.
Fairfield MS	Option D does not support the best interest of the children or the community in the Fairfield District.
Holman MS	Yes I like this option.
Holman MS	Worst as it causes more problems.
Holman MS	Will it prevent future overcrowding? I'm tired of being redistricted. This option is the best for us since it wouldn't redistrict us.
Holman MS	Why should students in a walking zone be transported at taxpayer expense to another school?
Holman MS	While I don't mind the feeder pattern for middle school, I am very opposed to the future overcrowding projections at DRHS.
Holman MS	We want to stay with our Shady Grove Elementary School friends. We have been alone at Holman Middle for too long.
Holman MS	We want THES to stay together at Holman. We have been at Holman since it opened; please don't move us now.
Holman MS	We support this option as we live close to Holman and like their technology programs. We would prefer to have our elementary-aged son feed to this school.
Holman MS	We live right across from Holman and it makes no sense for us to go to SPMS. Also, in 2-3 years, SPMS will become so overcrowded with all the new development that we will be right back to redistricting again. We at THES have been the backbone of HMS for the last 6 years and want to continue to be.
Holman MS	We live right across from Holman and it makes no sense for us to go to SPMS. Also in 2-3 years, SPMS will become so overcrowded with all the new development that we will be right back to redistricting again. We at THES have been the backbone of HMS for the last 6 years and want to continue to be.
Holman MS	We live right across from Holman and it makes no sense for us to go to SPMS. Also in 2-3 years, SPMS will become so overcrowded with all the new development that we will be right back to redistricting again. We at THES have been the backbone of HMS for the last 6 years and want to continue to be.
Holman MS	We live across from Holman and it makes no sense to move us to Short Pump. Option E will have us overcrowded, in trailers like Colonial Trail, and going through another redistricting for middle school again in another 2-3 years.
Holman MS	We live across from Holman and it makes no sense to move us to Short Pump as in Option E. Majority of THES does not agree with Option E. We have been the backbone of Holman for the last 6 years and want to continue to be.
Holman MS	We live across from Holman and it makes no sense to move us to Short Pump as in Option E. Majority of THES does not agree with Option E. We have been the backbone of Holman for the last 6 years and want to continue to be.
Holman MS	We have been at Holman for 6 years. We are the backbone of the school. The heart of the school. The PTA of the school. The fundraisers and volunteers for the school. Don't destroy Holman and break our hearts by moving us out.
Holman MS	We could walk if we wanted to Holman. All of our THES will stay together. There's a good mix of Rivers Edge there, too. We all work so hard for our kids to get a diverse education with kids from different schools, but some from the same school so we don't lose our community.
Holman MS	Very much oppose. Would send my child to a middle school further away than current middle school and then send to a high school with less than 20% of her peers.
Holman MS	Too many splits for elementary schools moving to different middle schools.

Live in Middle School	Option D Adjusted Thoughts/Observations
Holman MS	This option splits Rivers Edge community twice, looking at the HS feeder pattern. This option does not seem effective with increased transportation cost and safety concerns as more students will be traveling further and on more active, major roads.
Holman MS	This option seems to be the most messy with splits and changes in many different directions.
Holman MS	This option requires school buses to go across Broad Street to get to proposed middle school. This will add unnecessary traffic issues for the buses and other commuters. This stretch of Broad Street is especially crowded in the morning due to office traffic pouring in from 295 and 64 highways. Additional school buses will cause significant delay to reach school and offices in the area. We bought this house with the understanding that Holman would be the middle school for our children- which has better TSA, better PTA, and overall school environment compared to Short Pump Middle. This option is very unfair because we will not be getting one of the biggest benefits of buying an expensive house in this residential area.
Holman MS	This option keeps THES together at one middle school, which is a better option for our kids.
Holman MS	This option is good because it keeps our school together.
Holman MS	This option has many problems: There is a very high traffic area of Broad Street that will need to be crossed which will cause delays for the school children as well as office-goers. This option spits communities. Involvement in PTA may go down due to the longer and more cumbersome traffic patterns and weaker PTA is not a good thing for any school. Lastly, it is unfair to the residents who have paid taxes with the idea that their children will go to a school that has very good school and afterschool activities.
Holman MS	This option effects most number of kids. Splits most number of schools. Puts my neighborhood kids in dangerous school bus routes. No, no, no .....BIG NO for this option.
Holman MS	This option doesn't feel good to me for a number of reasons. One is that it may have the greatest number of additional middle school to high school splits. I say "may have" because tucked away on a document about additional modification considerations is a statement that there will be no splits for Short Pump MS as reported in the pros/cons...Why no splits for Short Pump and three for Holman? Also, as I understand it from others who have attended work sessions, this option would involve greater expense because of odd transportation fixes/accommodations (i.e. busses going to the same neighborhoods at the same time for two different middle schools over the course of two years). It seems that this option was created to kowtow to HHHunt re: River Mill and the accompanying controversy.
Holman MS	This map keeps our elementary school together at our current middle school: Holman. We were one of the first neighborhoods to populate Holman. We built it & volunteered in it, and raised money for its programs. We want to stay!
Holman MS	This makes no sense! This calls for transporting kids past one middle school to get them to another and for some, includes a ride on 295 during morning rush hour! Do not let HHHunt bully you!!!!
Holman MS	This is the only map that keeps Twin Hickory together at Holman Middle. I volunteer there and love the programs - like robotics - that Short Pump doesn't have!
Holman MS	This is the absolute worst option for my child as it would tear her away from most of her friends for middle school by going to Short Pump rather than Holman and she would be in the minority going to Glen Allen High School. This option should be eliminated.
Holman MS	This is my least favorite of the four options. I only like it because it does correct the feeder pattern at Shady Grove Elementary. However, I do not like this option because the Sadler community is redistricted to SPMS and this will negatively impact traffic and increase congestion in the Twin Hickory neighborhood, around Deep Run High School,

Live in Middle School	Option D Adjusted Thoughts/Observations
	and along Nuckols and Shady Grove Roads during the morning commute as Sadler residents will need to use these roads to get to SPMS.
Holman MS	This changes our middle school and we oppose that.
Holman MS	The THES community loves Holman. We want to stay together in this school because we were sent there at the last middle school redistricting & want to stay there at Holman.
Holman MS	The amount of transportation costs would be ridiculous. There will 2 buses in my neighborhood at the same time to pick up for 2 different middle schools since my daughter would be still attending HMS and son would begin to attend SPMS. Since both schools have the same start time, the county would have to have more buses, more drivers, more \$ for fuel, and the routes would be dangerous in the highly congested Innsbrook area. Only 13% of my son's class would then attend GAHS. During formative years, he may not be attending with his friends. So he will attend SPMS with 1/2 of his friends and then an even smaller group into GAHS. Chamberlayne ES split would be less balanced between Brookland MS and Wilder MS. Current split: 59% Brookland/41% percent Wilder Option D (Adjusted) split: 83% Brookland / 17% Wilder; Glen Allen ES would be split between Holman MS and Hungary Creek MS. Option D (Adjusted) split: 23% Holman /77% Hungary Creek; Rivers Edge ES would be split between Holman MS and Short Pump MS (currently feeds entirely into Holman). Option D (Adjusted) split: 55% Holman / 45% Short Pump. Twin Hickory ES area that is in non-transportation zone for Short Pump MS would stay assigned to Holman MS, requiring bus transportation. Longan ES would be split between Holman MS and Hungary Creek MS. Option D (Adjusted) split: 33% Holman / 67% Hungary Creek. Laburnum ES would be split between Moody MS and Wilder MS, although split would be balanced. Option D (Adjusted) split : 36% Moody MS/ 64%Wilder MS.
Holman MS	Support, but there are better options.
Holman MS	Support it.
Holman MS	Strongly oppose.
Holman MS	Strongly oppose.
Holman MS	Strongly oppose.
Holman MS	Significantly worst one of the options. Totally unbalanced. Has a lot of pockets were kids won't be able to take some friends to the next school; not just once but twice! Struggle to see who benefits, if anyone, and definitely affect the most negatively.
Holman MS	Short Pump Middle School is significantly farther from our neighborhood than Holman, and only 13% of students will continue to Glen Allen High School.
Holman MS	Second choice.
Holman MS	Sadler Road should not be sent to Short Pump MS especially since sending them there would either mess up their feeder pattern to Glen Allen HS OR would have them switched to Deep Run, which is already forecasted to be overcrowded in a few years. Cannot support any plan that moves kids into Deep Run HS due to overcrowding issues.
Holman MS	Rivers Edge neighborhood is growing rapidly. They are not going to fit into Holman in a few years. Move some of those students/neighborhoods to Short Pump where you have extra space.
Holman MS	Ridiculous to make students from Sadler Road travel past Holman to Short Pump MS when Twin Hickory community is within walking distance (which would save money).
Holman MS	Poor planning. Option with the most negative impact. Will put high schools at over capacity. Increases transportation expenses.
Holman MS	Our kids at THES can stay together at Holman.
Holman MS	Option D keeps Twin Hickory Elementary together, which I like, and at the same middle school that they currently feed. However, it does not seem to be the most logical as far as which neighborhoods attend which middle school.

Live in Middle School	Option D Adjusted Thoughts/Observations
Holman MS	Option D keeps THES together at a single middle school! It also has a more equitable split between the Twin Hickory communities and does not make my neighborhood (Scots Glen at Twin Hickory) one of four neighborhoods attending a separate middle school from the rest of Twin Hickory.
Holman MS	Option D keeps our neighborhood in two feeder patterns.
Holman MS	Option D keeps my neighborhood into two feeder patterns.
Holman MS	Option D Adjusted allows for the most optimal of circumstances given all of the options. It does not over-impose or create inequity in schools or neighborhoods and provides a more balanced poverty rate for all schools involved. I strongly support this option.
Holman MS	Oppose. Most students affected (prior to Option E). Arbitrarily drawn lines to cater to Twin Hickory demands. Bus routes make terrible sense for Innsbrook area.
Holman MS	Oppose.
Holman MS	Ok option.
Holman MS	Not pleased.
Holman MS	Not a good choice. Keep Rivers Edge and Holman together.
Holman MS	NO! Geographic lines are not sensible as they do not support goal of transportation efficiency or logical feeder patterns. We can walk to Short Pump Middle but in this option we are being bused to Holman. At the same time, Rivers Edge students are being bused a longer distance, past Holman, to get to Short Pump. Adjusted D splits the most middle schools. Short Pump Middle will split to two high schools only in this option. I do NOT support the Option D Adjusted high school consideration as seen on website that suggests the area moving from Holman MS to Short Pump MS would attend Deep Run HS to avoid Short Pump MS high school split! This consideration will put Deep Run High school at an unacceptable 117% utilization. Please just keep as much of Twin Hickory at Short Pump as possible to avoid these issues.
Holman MS	My area was previously redistricted from Springfield Park ES to Rivers Edge ES. Now splitting Rivers Edge ES between Holman MS and Short Pump MS; then having this area go to a different high school from most others at the middle school level does not make sense. Please keep Rivers Edge ES together for one middle school.
Holman MS	Makes zero sense to have kids split up at REES. Please keep our community together!
Holman MS	Majority of Twin Hickory families stay at Holman. Majority of THES does not agree with Option E. We have been the backbone of Holman for the last 6 years and want to continue to be.
Holman MS	Love this option because it keeps Twin Hickory Elementary together! But this is not my first choice. Option E is my first choice and this survey does not bring Option E up unless you strongly oppose all the other choices.
Holman MS	Keeping THES together at Holman is very important to my family.
Holman MS	Keep THES together at Holman Middle School.
Holman MS	Impacts too many.
Holman MS	I would prefer Option D.
Holman MS	I want my child to go to Holman like his older brother.
Holman MS	I support this option the least because it divides so many elementary schools by having the students attend various middle schools.
Holman MS	I support the option since my Shady Grove Elementary student would follow her friends and peers to Short Pump versus being separated and sent to Holman.
Holman MS	I support Option D only if Dalton Park feeds to Deep Run High. Based on this option, only 13% of Short Pump would go to Glen Allen. My kids will have very few friends from elementary and middle school in high school in this option. So, consider feeding pattern.
Holman MS	I support Option D because it keeps all of THES feeding into a single middle school.

Live in Middle School	Option D Adjusted Thoughts/Observations
Holman MS	I support Option D adjusted because it keeps us in the same feeder pattern and allows all of Twin Hickory Elementary to stay at Holman where we have been for the last 6 years. Please do not change our feeder pattern again! This is my 3rd redistricting since moving to Twin Hickory.
Holman MS	I strongly support Option E, but that is not on the survey.
Holman MS	I strongly oppose Option D because it makes changes to the Deep Run HS enrollment boundaries and projections. It puts Deep Run at 117% in 2024.
Holman MS	I prefer the view for Holman in this option compared to all the others. It is the only option that I would support. (I still think Hampshire should go to Holman).
Holman MS	I love Option D! It keeps Twin Hickory Elementary School going to Holman!
Holman MS	I love my neighborhood and THES. It has been such a good school. We want to go to Holman with our friends and see kids that went before mine again. We've heard such wonderful things about Holman. We have not heard the same at Short Pump Middle (sorry). And we want to join the TSA with Mr. Turner. He is at Holman and we want to be there.
Holman MS	I live just across from Holman and want my family to stay together in same school.
Holman MS	I live just across from Holman and my first kid is already there. I want to keep my family together and I cannot deal with division of my family. I moved to this area only to have this school for my kids.
Holman MS	I live across from Holman Middle school and my first kid is already there and this option will keep my family together. I work in downtown but moved here only to have this school for my kids.
Holman MS	I like this option because my elementary school is able to stay together at Holman Middle School. However, I wish you could correct the feeder pattern happening at Holman into high schools and I do not like the overcrowding at Deep Run.
Holman MS	I like that this option keeps THES together at one middle school.
Holman MS	I don't like this options because of the low number of students that my children will continue their education with from elementary to middle and then middle to high.
Holman MS	I do not like this. This option has obvious cut outs to make one small vocal group happy. It is bad for transportation, kids who now go to Holman would either have to go to SPMS by way of Broad Street through several of the most dangerous intersections or almost pass Holman to go several miles further. Kids who could walk to SPMS instead are bused to Holman.
Holman MS	Geographically doesn't make sense and does not allow students to walk to school. Option D Adj is not a smart use of transportation. This Option splits yet another middle school...Short Pump MS....and the split is unbalanced. As Option D Adjusted is being considered, please do NOT entertain the idea (as seen on the website) that the area moving from Holman MS to Short Pump MS would attend Deep Run HS to avoid Short Pump MS high school split. This transfers the overcrowding issue to Deep Run at an astronomical 117%. Prefer single feeder patterns and Option D Adj buses neighborhood kids to Holman that splits to three high schools when they live NEXT to Short Pump that solely feeds into Deep Run.
Holman MS	Don't like option D!!
Holman MS	Don't like it
Holman MS	Divides up REES and then those kids get divided again in high school.
Holman MS	Divides our neighborhood, not a fan
Holman MS	Cons: Only a small percentage of students from the Sadler Area would feed into Glen Allen High School from Short Pump Middle. The majority of Short Pump Middle feeds into Deep Run High School. Also have transportation concerns about bussing through Twin Hickory to get to Short Pump Middle while Twin Hickory is bussed to Holman Middle School.

Live in Middle School	Option D Adjusted Thoughts/Observations
Holman MS	As the Director of the Village at Innsbrook HOA I am opposed to Option D because it sends children in this area past their current designated middle school and past Twin Hickory when it makes way more sense logistically to send children who already live close to Short Pump to that school.
Hungary Creek MS	Zoning the new River Mill subdivision to HCMS and GAHS is very short sighted. While this may alleviate the current overcrowding somewhat - it is setting these schools up to be overcrowded again - while leaving other schools with a fair amount of capacity. It is shameful that the selling aim of a developer is taking precedence over our existing residents! The projections show HCMS and GAHS overcrowded again in years with this option - and this is with the flawed student formulas in place. When we were told how the formulas work for determining the estimated number of students from a new development - it was laughable how inaccurate they are. I think the situation will be even worse than the projections. This impacts my kids' education, my home value and I'm not happy. Option C is the only good choice!
Hungary Creek MS	While from a Hungry Creek Middle School perspective the change would be positive, having River Mill attend Glen Allen High School will do nothing to alleviate the current overcrowding that GAHS is experiencing. As a property owner/taxpayer it is preferred that excess capacity at other high schools be leveraged to alleviate overcrowding than to continue at enrollment levels that exceed capacity and/or making capital improvements to alleviate the overcrowding.
Hungary Creek MS	Transporting children on buses without seat belts on I295, with the morning rush hour traffic, is dangerous and uncalled for.
Hungary Creek MS	Too many splits
Hungary Creek MS	This still seems to have an issue with sending kids who are within walking distance from one school to a totally different school.
Hungary Creek MS	This plan adds to the long term overcrowding problem by zoning future students in River Mill to HCMS and GAHS and shifting students who should go there away in order to make room.
Hungary Creek MS	This options splits us up from the GAES children and sends our small community of Hunton Park children to Holman. Hunton Park children will be sent on the interstate to get to Holman; this seems to be an added safety risk that the HCPS is taking with our children. The deduction of the numbers that will be seen at Hungary Creek by sending Hunton Park to Holman is minimal and won't truly help the overcrowding issue. I am strongly opposed to this option.
Hungary Creek MS	This option will still keep River Mill in HCMS and GAHS.
Hungary Creek MS	This option makes no sense. More kids are impacted by this option, transportation of children on buses is longer for many of the students impacted, pushing kids from GAES and from Echo Lake to Holman just to make room for River Mill which should be districted to Brookland Middle School.
Hungary Creek MS	This option does not adequately address overcrowding at Hungary Creek.
Hungary Creek MS	This keeps River Mill in the Hungary Creek school district. Magnolia Ridge residents feel that zoning River Mill to Brookland will be a huge obstacle to revitalizing the Route 1 corridor. We are also concerned that if this bordering community is zoned to Brookland, then eventually we could be rezoned to Brookland. This hypothetical possibility would fail to provide out children with the quality education they would get at a higher achieving school. Additionally, this would hurt current home values, again making it difficult to bring fruitful commerce to our area of Henrico County.
Hungary Creek MS	This is okay, though it seems Pocahontas boundaries don't veer as south-eastward as preferred.
Hungary Creek MS	This is another good option for us (my opinion is the same as Option A).
Hungary Creek MS	This can be a viable option for immediate relief. But need a long term solution.

Live in Middle School	Option D Adjusted Thoughts/Observations
Hungary Creek MS	The main focus must be reducing the overcrowding at HCMS, not addressing the needs of unknown students who are not residing in houses that are not yet built.
Hungary Creek MS	Strongly oppose for the same reason I Strongly Oppose Option A Revised. It overcrowds HCMS & GAHS by allowing FUTURE FAIRFIELD District to overcrowd Brookland District schools. It also splits Glen Allen community.
Hungary Creek MS	Strongly oppose
Hungary Creek MS	Seems like this is the strongest option.
Hungary Creek MS	Same as Option A
Hungary Creek MS	Options A and D provide immediate relief at Hungary Creek Middle School. If our goal is truly to get this school to the target capacity, only Options A and D provide immediate relief. Options C and E would result in Hungary Creek having nearly 100 more kids (than Options A and D) in 2018.
Hungary Creek MS	Option D is great because it allows for the accommodation of the new gifted program at Wilder.
Hungary Creek MS	Option D adequately relieves overcrowding at HCMS and also keeps River Mill in its currently zoned schools- HCMS and GAHS.
Hungary Creek MS	Option C still has HCMS at 100% capacity for 2018!! The purpose of this redistricting plan is to alleviate the overcrowding at the middle school and Option C does not immediately fulfill this goal, but this option would.
Hungary Creek MS	Oppose. The current HCPS mini-redistricting effort was initiated as an intervention to alleviate the over-crowding at Hungary Creek Middle School, which is so over-capacity the school has 5+ trailers to accommodate current students. Any redistricting option which zones River Mills (a 1,000+ high density dwelling future development) into this already crisis-level student population at Hungary Creek is insane. Henrico County and the developer *should* be working together to build new schools to accommodate the heavy growth and expected development along the Virginia Center Commons area. HHHunt did so for both the Wyndham and Twin Hickory developments, both situated in the West End of Henrico County.
Hungary Creek MS	One of the 2 best options for the students, the communities impacted and the county, with Option E being the best option in every aspect. Immediate relief for Hungary Creek, while also keeping River Mill zoned for Hungary Creek/Glen Allen, which will help bring more people to that area of the county, leading to even more expansion in that area and allow for great revitalization of Route 1 area.
Hungary Creek MS	Ok
Hungary Creek MS	Not the best option for my family.
Hungary Creek MS	Not good
Hungary Creek MS	Not an option for us and should not be considered - splits up GAES, continues to drive overcrowding in both MS and HS, continues to enable River Mill to flow into a path that does not make sense simply because they do not want to sell a development for the Brookland and Hermitage schools.
Hungary Creek MS	Nope.
Hungary Creek MS	No
Hungary Creek MS	Neutral
Hungary Creek MS	Neutral
Hungary Creek MS	Negative
Hungary Creek MS	Magnolia Ridge needs to remain at Greenwood Elementary.
Hungary Creek MS	Keeping school boundaries in the same neighborhood is beneficial for community and growth.
Hungary Creek MS	It provides the most relief to HCMS beginning in 2018. I would still like to see the school under 100% for this Fall 2017 but it does not seem to be the case in any of the plans. This

Live in Middle School	Option D Adjusted Thoughts/Observations
	is a critical time in our children's lives. They do not need to worry about going into an overcrowded school. As a county we should allow our rising sixth graders the choice to go to their newly zoned school regardless if they have a sibling.
Hungary Creek MS	Immediate relief to HCMS.
Hungary Creek MS	I like Option D the most.
Hungary Creek MS	I have strong support for Option D. I wish these changes were going to be effective for the 2017-2018 year because our children will still be overcrowded at a critical time.
Hungary Creek MS	I do not approve of the feeder patterns with this option.
Hungary Creek MS	I agree that River Mill and Magnolia Ridge should be kept together at Hungary Creek MS and Glen Allen HS.
Hungary Creek MS	Hunton Fields - shows 2 middle school children with 25 houses under construction now? Swanson Mill shows one child with 4 houses currently breaking ground and about 4 more lots left with developer having option of 100 more acres in here that connect to Swanson Mill. Projection is one middle school child? Then 104 middle school kids from River Mill with 1000 homes? These are just 3 examples of outrageously under estimated projections. Hungary Creek is once again in jeopardy of overcrowding immediately due to poor planning based on wildly inaccurate projections. Risk of River Mill massive development needs to go to schools with current capacity.
Hungary Creek MS	Does not help with overcrowding at HCMS.
Hungary Creek MS	Do not support.
Hungary Creek MS	Best option for growth
Hungary Creek MS	Also a good option, just does not address transportation issues as Option A did.
Hungary Creek MS	Again, doesn't achieve the capacity relief for HCMS and GAHS.
Moody MS	I wish that the Greenwood areas like River Mill or Magnolia Ridge were zoned to Brookland then this would be the perfect plan.
Quioccasin MS	Twin Hickory to Short Pump.
Short Pump MS	We need to rethink boundaries. REES will be growing with the new 300 houses being built. To send some students to SPMS now would make it easier when more kids go in the future. They will stay with their friends.
Short Pump MS	This seems like an odd split between Holman and Short Pump Middle that isn't driven by geographic boundaries or transportation costs. Option E is much better.
Short Pump MS	This plan is just mean. To send 87% of Short Pump Middle to one High School and 13% to another??
Short Pump MS	Strongly oppose.
Short Pump MS	Option D provides two feeder patterns which isn't ideal.
Short Pump MS	Not the best option.
Short Pump MS	Not the best option
Short Pump MS	Makes no sense. Financial irresponsible.
Short Pump MS	Looks good
Short Pump MS	Improvement. However, it does not go far enough to keep elementary schools together and plan for the future overcrowding.
Short Pump MS	I think this is ridiculous. Why would I want the students that could walk to Short Pump to go a different middle school? And waste gas on buses when no transportation would be necessary. Also, I would rather my community have the majority go to the same middle school instead of being split between two.
Short Pump MS	Has the potential to increase capacity at Deep Run HS.
Short Pump MS	Fiscally irresponsible and has the LEAST common sense. Option D affects the MOST number of students. ADDS a bus route to what is currently a non-transportation zone. Lists 7 pros vs. 10 cons. Results in 7 schools with splits that have a less 23% feeder continuity. The worst ratios of all the options. Shows a complete lack of common sense.

Live in Middle School	Option D Adjusted Thoughts/Observations
Short Pump MS	Fiscally irresponsible and has the LEAST common sense. Option D affects the MOST number of students. ADDS a bus route to what is currently a non- transportation zone. Lists 7 pros vs. 10 cons. Results in 7 schools with splits that have a less 23% feeder continuity. The worst ratios of all the options. Shows a complete lack of common sense.
Short Pump MS	Don't split Short Pump Middle. Keep Twin Hickory at Short Pump.
Short Pump MS	Best outcome for students. Longer term relief for Hungary Creek.
Short Pump MS	Bad option for our community.
Short Pump MS	1. Feeder patterns split schools into very small percentages, so too many kids are separated from majority of their friends. 2. Bus routes pass schools that are closer to kids' homes and unnecessarily through dangerous intersections. 3. Does not address capacity issues 4. Impacts the largest number of kids.
Wilder MS	It splits up way too many kids out of River's Edge who have made friends over their 6 years as an Eagle. Middle school is hard enough w/o forcing them to make a whole new group of new friends and then have to do it again once they hit Glen Allen HS.
Wilder MS	I don't think it makes much sense to have the kids in general area to attend Moody Middle School which is NOT close to home but still send them to Henrico High School. That does NOT makes sense.

Live in Middle School	Option E Thoughts/Observations
Brookland MS	Residents of River Mill should NOT be given preferential treatment over residents in lower income neighborhoods. That is discrimination.
Brookland MS	Every option presented leaves the three middle schools furthest to the east with a significantly higher percentage of low income students. The disparity between the school with the lowest percentage and the school with the highest percentage is a glaring 60+ point difference. If the county wants to encourage all schools to achieve accreditation, and reduce the accusations of racial and economic discrimination, a good starting point is this redistricting project. It might not be the most convenient for transportation, school zone boundaries or separation of community components but, a more equitable division of lower and higher income families between schools would go a long way toward showing that the county isn't discriminating in education. It would also give the lower performing schools the boost they need to meet accreditation, which is beneficial to the entire county.
Fairfield MS	Approve Option E, it will be the best option for the Fairfield District and the students in our community.
Holman MS	YES!!! Option E allows all of the Twin Hickory community to go to the same middle school and subsequently does not split Twin Hickory Elementary school. To help prevent overcrowding at Short Pump middle with West End's upcoming new developments, please highly consider sending West Broad Villages to Pocahontas!! West Broad Villages (44 students) can walk to Pocahontas and wouldn't have to be bused across Broad Street.
Holman MS	YES!! Option E supports many of Henrico County's goals of creating attendance zones that work efficiently with the transportation system, keeping communities intact, and relieving Hungary Creek overcrowding. I love that this Option puts all of the Twin Hickory community at Short Pump MS which not only keeps Twin Hickory Elementary together but also Rivers Edge together. Option E maintains the concept of geographic zoning for schools, which encourages the participation and involvement of geographically contiguous communities. Option E also establishes zones where students can walk to school where possible!!
Holman MS	Years ago when Colonial Trail was built, there was tremendous discussion about providing a school exclusively for a few neighborhoods. The idea was to not create a school that a neighborhood exclusively feeds as it creates a sense of outsiders for anyone who lives outside of the neighborhood. Option E would make Short Pump MS a version of the exclusive school for a select few large neighborhoods. I think this is bad for HCPS as a whole.
Holman MS	While this fixed a lot of the feeder pattern issues, you are setting Short Pump up to be overcrowded in a few years. If this is implemented, I suggest you also move the Fox Hall area OUT of Short Pump MS and into Pocahontas and Godwin. Otherwise you are being short sighted and crowding Short Pump when there are a large amount of new homes being built nearby.
Holman MS	This options works well in terms of transportation on the west side, but creates a small group of 19% of kids leaving Holman going to DRHS. ONLY 6% of kids will leave HCMS and go to Tucker. I support this for keeping REES together & DO NOT SUPPORT it for my kids that will be effected with the jump to HS. They will go in to Deep Run as a small 19% of the kids leaving Holman. The solution seems to be to stop letting HH Hunt bully the board. We are adding kids into schools that don't exist and will not exist for a few more years!!!!
Holman MS	This option keeps communities together and keeps PTAs strong.
Holman MS	This option impacts more students.
Holman MS	This option corrects feeder patterns at Shady Grove & Twin Hickory Elementary and positively impacts other elementary school feeder patterns in the community. I cannot

Live in Middle School	Option E Thoughts/Observations
	express how much it helps the middle school experience for students when you have the bulk of your fellow elementary students/friends going to the same middle school. This option also has less traffic impact and transportation issues which is a plus. This is definitely the BEST option! I implore the School Board to vote for this option at the end of June school board meeting so that the redistricting process can conclude and all communities impacted can begin the process of moving forward with a certain future of where our children will be starting school in the Fall of 2018. I understand this is an arduous process and commend the board for their hard work! Please vote Option E!
Holman MS	This is the best plan since it makes more sense. All Twin Hickory students and Shady Grove students will stay together. Other schools will get relief. Transportation routes make more sense.
Holman MS	This is the best option for my neighborhood in keeping the children together especially from Elementary to middle school.
Holman MS	The best option that impacts the least...
Holman MS	Thank you for bringing our community FINALLY back together! : )
Holman MS	Strongly support
Holman MS	Seems to think a little more long term than the others.
Holman MS	Overall, I would support this over Option D.
Holman MS	Option E keeps THES together at a single middle school, which is what most families want. (We have a petition signed by 270 people asking to keep THES together.) Option E treats Twin Hickory like a community again and brings ALL of the neighborhoods into a single middle school. It does not separate my neighborhood (Scotsglen at Twin Hickory) as well as Avery Green, Jamerson Park and Willows Bend (census tracts-38 and 54) from the rest of Twin Hickory like Options A and C.
Holman MS	Option E is the best option for us as a community, it brings our ENTIRE NEIGHBORHOOD together into one feeder pattern at Short Pump Middle School. For those of us at Twin Hickory Elementary, it also keeps all THES students together.
Holman MS	Option E is the best option for us as a community, it brings our ENTIRE NEIGHBORHOOD together into one feeder pattern at Short Pump Middle School. For those of us at Twin Hickory Elementary, it also keeps all THES students together.
Holman MS	Oppose. Boundary lines arbitrarily drawn means that, for example, kids walking distance to Hungary Creek will be bused to Holman. Kids walking distance to Holman will be bused to Short Pump. The arbitrarily drawn boundaries also means this will need to be redrawn in the near future, instead of drawing map lines that make sense. Feeder patterns are terrible for some areas. 7% of Fairfield kids to Henrico HS. 6% of Hungary Creek kids to Tucker. Way too disruptive for kids, and all options should focus on none of these percentages being below 35% so as not to marginalize these kids. Clearly this option is still intended to cater to Twin Hickory demands.
Holman MS	Ok but it impacts the highest number of kids
Holman MS	Of all the options being considered, this is the least desirable. Short Pump MS is farther away from us and we prefer Holman's technological programs
Holman MS	Not my favorite, but it is better than option D. I still prefer C as it makes the most sense. You need to stop adding options and just make a decision.
Holman MS	No opposition
Holman MS	No comment
Holman MS	No change for us.
Holman MS	My family's favorite option!!

Live in Middle School	Option E Thoughts/Observations
Holman MS	Most well balanced of the options, seems the least impacting of the options. Allows, for the most part, for kids to take some friends to the next school to make the change less intimidating. Small area going into Tucker HS from Holman is the biggest of the options to lessen the impacts.
Holman MS	Makes more sense to split Twin Hickory ES than to send them all to Short Pump MS. Does keep Sadler Rd. at Holman, which is great!
Holman MS	Love this option, it keeps our school together and it reunites our neighborhood after being separated so long in a past redistricting!
Holman MS	Love it. It fixes feeder patterns for Shady Grove ES, Twin Hickory ES & Rivers Edge ES. It's a win-win for all 3 elementary schools.
Holman MS	Keeps most schools together. Provides better transportation for most kids. Con: please do not split small number of kids from high school.
Holman MS	I think this option is a perfect option as it keeps the Twin Hickory community together. Thank you for listening to the community! We so appreciate all you do.
Holman MS	I think the proposed new development of River Mill up by Virginia Center Commons should be zoned in a way to equal out high school capacity issues. And what the developer would like to happen should not come into the decision making process of the school board.
Holman MS	I support this option, because it allows all of Twin Hickory Elementary School students to feed into the same middle school.
Holman MS	I strongly support Option E because it keeps Twin Hickory Elementary School at a single middle school and it brings the Twin Hickory community back together into one middle school.
Holman MS	I strongly support Option E because it (1) keeps THES feeding into a single middle school and (2) treats Twin Hickory like a community again feeding into a single middle school.
Holman MS	I fully support E because it keeps both our neighborhood of Twin Hickory together along with Twin Hickory Elementary together. Those who have opposed E because of Deep Run numbers do not understand that Deep run is the same in all 4 scenarios.
Holman MS	I feel this is the best option for all interested parties
Holman MS	I feel like it, like C, addresses the ineffective transportation issues Adjusted D causes. My biggest concern is the # of students going from HMS to DRHS - 19% with the close physical proximity from these schools, it doesn't make sense.
Holman MS	I don't like that the most students are affected by this option, but I do like that the odd transportation fixes/accommodations from option D are largely addressed here. I do not like that only 19% of Holman MS students will attend Deep Run HS which is only 1.7 miles away. I'm not pleased that there is a three way split in all of the options, but this one is the most unbalanced (option A has it at 30%, option C has it at 34%, and option D has it at 16% - 19%, which is a long ways off from any of these others).
Holman MS	I do not support this option because it impacts the most students.
Holman MS	I do not oppose this since it isn't affecting my community as much as Option D Adjusted. However, I don't strongly support it since this affects the largest number of students.
Holman MS	E is a phenomenal option. It provides a direct feeder pattern for my neighborhood of Twin Hickory and Twin Hickory Elementary! It is better for us and is also good or the same for most other schools as C and D. Please vote for this option! Please reunite our community!
Holman MS	Better choice
Holman MS	Best option as it fixes feeder patterns and is the best option of all.
Holman MS	Best option

Live in Middle School	Option E Thoughts/Observations
Holman MS	At this point support this option, as consideration has been made for existing students as opposed to students who are yet to be part of the community with housing that hasn't even been built yet.
Holman MS	Appears to be a little more smoothly in terms of transitions between schools as the kids grow up, with similar changes to other systems affected as the other proposals. How is it that it's not just been developed as a pyramid scheme from the beginning? My system growing up was 4 elementary schools to 2 middles to 1 high school. Build as needed but keep the pyramid scheme, even if new schools are under capacity in the beginning. As long as good teachers overall. Maybe coordinate after-school activities or sports to minimize resource usage. I'm sure it's a lot more complicated than I realize but this just seems WAY more complicated than it needs to be. Maybe the problem needed to be looked at separately from each high school downwards. Very complex to try to decide what's good for your own kids as well as minimize impact on everyone else in such a wide area.
Holman MS	All students from Twin Hickory will be attending the same school, and none will be separated.
Hungary Creek MS	Yes
Hungary Creek MS	While it keeps GAES together thru HS, it continues to enable River Mill to flow into a path that does not make sense simply because they do not want to sell a development for the Brookland and Hermitage schools. This will create an overcrowding situation AGAIN in MS and HS. It is not an option for long term to enable GAES to get out of the over-crowding issue.
Hungary Creek MS	While it does a good job of keeping children from different elementary schools together for middle school it does not address my biggest concern of the addition of River Mill into the Brookland District and the subsequent overcrowding that will create!
Hungary Creek MS	While from a Hungry Creek Middle School perspective the change would be positive, having River Mill attend Glen Allen High School will do nothing to alleviate the current overcrowding that GAHS is experiencing. As a property owner/taxpayer it is preferred that excess capacity at other high schools is leveraged to alleviate overcrowding than to continue at enrollment levels that exceed capacity and/or making capital improvements to alleviate the overcrowding.
Hungary Creek MS	Too many splits. I feel like many of your plans cater to the far west end, an area that has two great choices. Focus on the areas that have greater needs.
Hungary Creek MS	This option does not adequately address overcrowding at Hungary Creek.
Hungary Creek MS	This is my preferred option. I feel that it is important to maintain the Route 1 boundary as the east boundary for MS and HS.
Hungary Creek MS	Strongly oppose this option. Divides the current Hungary Creek population to hold spots for those residents that have not purchased their homes. It will also increase capacity at Glen Allen High. Lastly, River Mill is not a part of the Brookland District.
Hungary Creek MS	Strongly oppose because HH Hunt's River Mill in Fairfield District is annexed into Brookland District schools. HCPS is pressing the easy button trying to fix accreditation issues.
Hungary Creek MS	Provides quicker relief to overcrowding at HCMS. Includes a development that has not even been built yet.
Hungary Creek MS	Oppose
Hungary Creek MS	Nope...don't want River Mill
Hungary Creek MS	NO.
Hungary Creek MS	negative
Hungary Creek MS	Magnolia Ridge needs to remain in Hungary Creek Middle and Glen Allen HS
Hungary Creek MS	I think this solves the issues the best. Still not happy with some of the walk zones, but this does the best job of meeting everyone's needs

Live in Middle School	Option E Thoughts/Observations
Hungary Creek MS	I strongly support this new option. This option keeps Hunton Park at Hungary Creek -- the board worked hard to listen to the petition that Hunton Park gave them at the last Public Meeting asking for Hunton Park to stay at Hungary Creek. This option immediately address the overcrowding issues at Hungary Creek. It also keeps more feeder schools (i.e., elementary schools) together. This is the best option that the Board has come up with to date.
Hungary Creek MS	I do not approve of the feeder patterns with this option.
Hungary Creek MS	I appreciate that Option E keeps all GAES students together K-12. However, I think Option C is a better choice for accomplishing this goal in that it does not create future overcrowding at GAHS. As well, Option E does not direct the benefits of new residential growth to BMS and HHS, yet Option C does.
Hungary Creek MS	Hunton Fields - shows 2 middle school children with 25 houses under construction now? Swanson Mill shows one child with 4 houses currently breaking ground and about 4 more lots left with the developer having the option of 100 more acres in here that connect to Swanson Mill projection is one middle school child? Then 104 middle school kids from River Mill with 1000 homes? These are just 3 examples of outrageously under-estimated projections. Hungary Creek is once again in jeopardy of overcrowding immediately due to poor planning based on wildly inaccurate projections. Risk of River Mill massive development needs to go to schools with current capacity.
Hungary Creek MS	Doesn't support capacity issues at HCMS and GAHS
Hungary Creek MS	Do not support. This option involves far too many students - nearly 250 more than Option C.
Hungary Creek MS	Clearly appeases one subdivision. Affects over 700 students. Does not help with overcrowding at HCMS
Hungary Creek MS	Best option
Quioccasin MS	Keeps neighborhoods together. Twin Hickory to Short Pump! Improved poverty distribution. Good use of Transportation
Short Pump MS	This plan seems to make the most sense in terms of feeding into the high schools.
Short Pump MS	This is the best option
Short Pump MS	This is the best and only option. Keeps kids together in the neighborhood. Going to same school close by. Keeping the neighborhood together!
Short Pump MS	Strongly support
Short Pump MS	Still crazy! Makes no sense - where are these crazy ideas coming from - no financial sense - keeping one elementary school together while adding more buses is ridiculous - the students don't need to stay together if it makes no sense.
Short Pump MS	Option E is the best option for us as a community, it brings our ENTIRE NEIGHBORHOOD together into one feeder pattern at Short Pump Middle School. For those at Twin Hickory Elementary, it also keeps all THES students together.
Short Pump MS	Option C is still better
Short Pump MS	Keeps kids in Twin Hickory neighborhood together at same middle school
Short Pump MS	I fully support this option. We are looking to put Twin Hickory neighborhood back together again. We want to be a COMMUNITY again!!!! You've already split us for elementary which is still upsetting!!! Bring us back together for middle and high!! The other plans have major flaws. Why would you send a child who literally sees SPMS in their immediate backyard over to Holman and then bus children who live past 295 all the way over to SPMS? This doesn't make any sense!!!! Do the right thing HCPS and make a redistricting plan that actually makes sense!!!!!! You've already missed the mark with the CTES redistricting--don't make another mess!!!!!!!!!!!!
Short Pump MS	Great choice!
Short Pump MS	Good option especially for transportation

Live in Middle School	Option E Thoughts/Observations
Short Pump MS	Best overall in terms of utilizing existing school capacity, reducing transportation, and accommodating new programs.
Short Pump MS	Best option for feeder patterns
Short Pump MS	Best choice because it corrects feeder pattern issues in our area
Short Pump MS	Approve of consolidation of Twin Hickory neighborhood into single middle school feeder pattern.
Tuckahoe MS	Twin Hickory to Short Pump
Tuckahoe MS	Twin Hickory to Short Pump
Wilder MS	Same as the other options.
